Dear Siska Yulia Defitri,

the manuscript THE ROLE OF POLITICAL WILL IN THE IMPLEMENTATION OF DIGITAL GOVERNMENT IN INDONESIA, submitted to Problems and Perspectives in Management Journal, needs to be revised.

Comments:

We ask you to align the manuscript following the Guidelines <https://businessperspectives.org/journals/problems-and-perspectives-in-management#submission-guidelines-for-authors>

Please, pay attention that the research paper, which is a final report on the finished original experimental study, the structure is Abstract, Introduction, Literature review, Method, Results, Discussion, Conclusion.

The number of words in the paper may vary from 4000 to 6000. Considering the issue concerning the calculation of the number of words in the paper, the information about the authors, title, abstract and keywords, list of references and appendix (up to 5 pages) should not be included.

Reduce the title. Clearly and concretely state the purpose of the study. At the same time, do not focus on one specific case.

Write the Abstract according to the following algorithm: first two or three sentences indicate the relevance of the topic; the aim and object of the study; the methodology (methods) of the study (for theoretical studies – its theoretical basis) are described; the obtained results and their practical value are characterized. Dedicate most of the Abstract to the result. While demonstrating it, provide quantitative characteristics. The volume of the Abstract should be 150-250 words.

The keywords should reflect the area of the research. The number of keywords should be 5-10 in average. There should not be the sentences, but the words or word groups. There is no need to replicate words from the title of the manuscript.

Specify JEL classification codes. They must be two-digital.
